COIN HISTORY · TRI-CORE BOTS · JAN 2020 → NOV 2026 · 4-HOUR

Our Coins Since 2020

Every coin the three bots trade live today, run through each bot's exact live rules on every 4-hour candle since January 2020: year by year, month by month, win rates, drops, and a verdict on each coin and on whether the bots still work now.

BB-CORE

The verdict

Yes, all three bots are working now, on the same pattern as their whole history. All three are up in 2026 so far (BB-CORE +105R, I-CORE +94R, T-CORE +141R) and over the last 12 months. BB-CORE and I-CORE won all 7 years; T-CORE won 6 (it lost −4R in 2023, a year without long trends). Every coin on every bot made money over its full history.

BB-CORE

Most and least profitable coin, per bot

BOT	MOST PROFITABLE	STEADIEST	LEAST PROFITABLE	WEAKEST RIGHT NOW (LAST 12 MO)
BB-CORE	GALA +161R, no losing year	ADA, all 7 years up	ARB +37R, lost 2023 and 2024	SOL +6R, ADA +7R
I-CORE	ZEC +203R, but +133R of it in 2025	ADA +174R, drop only 10R	NEAR +90R, 3 losing years	ADA +1.8R (flat)
T-CORE	ZEC +256R, but +203R of it in 2025	ETH +177R, all 7 years up	SUI +43R (since mid-2023)	ADA −7R

How to read R. R is one unit of risk: what a trade loses if it hits its stop. Dollars = R × what each trade risks. At $5 a trade, +100R = +$500. The bots trade several coins at once, so totals add up across coins. Fees (0.05% a side), slippage (0.02% a fill) and real funding are already taken off.

All coins across all three bots

Total profit since 2020 · share of trades won · years up · verdict. Each coin is compared with its own bot: **Strong** at most one losing year, high profit factor, up in the last 12 months; **Solid** at most one losing year; **Mixed** profitable overall but lost 2 or more years; **Watch** losing in the last 12 months.

What the coins have in common

- **Win rates are low on purpose.** BB-CORE wins about 1 trade in 3, I-CORE 1 in 3, T-CORE about 1 in 5. They make money because wins are much bigger than losses. Long losing runs are normal: up to 17 losses in a row on BB-CORE, 16 on I-CORE and 27 on T-CORE happened in the past.
- **ZEC is the biggest earner on I-CORE and T-CORE, mostly from one year.** Its 2025 rally gave I-CORE +133R and T-CORE +203R. ZEC lost money in 2023 on all three bots.
- **ADA is the most reliable old coin** (all 7 years up on BB-CORE, 6 on I-CORE) but has gone quiet lately: +7R, +2R and −7R over the last 12 months on BB-CORE, I-CORE and T-CORE.
- **NEAR and ARB are hot right now** (strong 2026 on every bot) after weak years: NEAR lost 2020 and 2025 on I-CORE and T-CORE (and 2023 on I-CORE); ARB lost 2023 on both bots it trades on.
- **GALA is BB-CORE's best coin** by total and by profit per trade, every year up. On I-CORE and T-CORE it lost 2025.
- **ETH is T-CORE's steadiest coin**: up all 7 years, a worst drop of only 10R on +177R profit, and its 5 best trades are only 73% of its total (every other T-CORE coin is near or above 100%).

Verdict per coin on BB-CORE

- Strong **GALA**: +161R from 219 trades, 38% won; no losing year; last 12 months +12R.
- Strong **ZEC**: +132R from 309 trades, 36% won; lost 2023; last 12 months +17R.
- Strong **SOL**: +128R from 280 trades, 38% won; no losing year; last 12 months +6R.
- Strong **ADA**: +120R from 302 trades, 35% won; no losing year; last 12 months +7R.
- Solid **NEAR**: +86R from 267 trades, 36% won; lost 2020; last 12 months +37R.
- Mixed **ARB**: +37R from 160 trades, 36% won; lost 2023 and 2024; last 12 months +29R; the 5 best trades made 118% of the total, so it depends on rare big wins.

BB-CORE: month by month, whole lineup

Profit in R per calendar month, all 6 coins together. Green = profit, red = loss, darker = bigger. Win % = share of that year's trades that closed in profit.

Verdict per coin on I-CORE

- Strong **ZEC**: +203R from 172 trades, 31% won; lost 2023; last 12 months +184R; the 5 best trades made 103% of the total, so it depends on rare big wins.
- Strong **ADA**: +174R from 177 trades, 36% won; lost 2026; last 12 months +2R.
- Strong **SOL**: +138R from 149 trades, 36% won; no losing year; last 12 months +11R.
- Strong **GALA**: +91R from 116 trades, 34% won; lost 2025; last 12 months +8R; the 5 best trades made 102% of the total, so it depends on rare big wins.
- Mixed **NEAR**: +90R from 155 trades, 30% won; lost 2020 and 2023 and 2025; last 12 months +25R; the 5 best trades made 112% of the total, so it depends on rare big wins.

I-CORE: month by month, whole lineup

Profit in R per calendar month, all 5 coins together. Green = profit, red = loss, darker = bigger. Win % = share of that year's trades that closed in profit.

Cumulative profit by coin

Most profitable: ZEC (+256R). **Least:** SUI (+43R, trading only since 2023). **Best profit per trade:** ZEC (+1.79R a trade). **Smallest drop for its profit:** ETH.

T-CORE: every coin, side by side

Sorted by total profit. Win % = trades closed in profit. Avg win / loss in R. PF = profit factor (all wins ÷ all losses; above 1 makes money). Worst drop = deepest fall from a peak, trade by trade. Streak = most losing trades in a row. Losing months counts only months with trades. Top 5 = what the 5 best trades made as a share of the total (above 100% = without them the coin lost money).

Verdict per coin on T-CORE

- Strong **ZEC**: +256R from 143 trades, 19% won; lost 2023; last 12 months +245R; the 5 best trades made 115% of the total, so it depends on rare big wins.
- Mixed **SOL**: +212R from 127 trades, 19% won; lost 2020 and 2022; last 12 months +15R; the 5 best trades made 107% of the total, so it depends on rare big wins.
- Strong **ETH**: +177R from 132 trades, 27% won; no losing year; last 12 months +24R.
- Watch **ADA**: +150R from 159 trades, 21% won; lost 2026; last 12 months −7R; the 5 best trades made 118% of the total, so it depends on rare big wins.
- Mixed **NEAR**: +97R from 108 trades, 22% won; lost 2020 and 2025; last 12 months +30R; the 5 best trades made 109% of the total, so it depends on rare big wins.
- Strong **GALA**: +93R from 103 trades, 23% won; lost 2025; last 12 months +12R.
- Solid **ARB**: +54R from 77 trades, 23% won; lost 2023; last 12 months +32R; the 5 best trades made 135% of the total, so it depends on rare big wins.

- Solid **SUI**: +43R from 73 trades, 22% won; lost 2023; last 12 months +6R; the 5 best trades made 145% of the total, so it depends on rare big wins.

T-CORE: month by month, whole lineup

Profit in R per calendar month, all 8 coins together. Green = profit, red = loss, darker = bigger. Win % = share of that year's trades that closed in profit.

How realistic are these numbers?

What the test includes, what it leaves out, and what to expect live.

- **Same rules as the VPS bots.** The research engine was checked against the bots' own core files trade by trade (16 of 18 bot/coin pairs identical; 3 trades out of ~6,000 differ on a rounding tie). **BB-CORE:** Bollinger close-through + SMA200, stop at the middle band, 48-candle time exit. **I-CORE:** Ichimoku cloud break + SMA200, 2 ATR stop, 7 ATR trailing stop. **T-CORE:** BB-CORE entry, 2 ATR stop, 14 ATR trailing stop (rides long trends).
- **Costs included:** 0.05% fee per side, 0.02% slippage per fill, real Binance funding payments from each coin's futures listing.
- **Prices:** Binance spot 4-hour candles (MEXC futures history is too short and too thin before 2023). MEXC prices track Binance closely, but a live fill can be a little worse than a test fill on a fast candle.
- **Window:** trades closed from Jan 1, 2020 to Nov 11, 2026. Each coin counts only from when it had 200 candles of history (the SMA200 filter needs them).

Expect live results to be lower than this. The bot settings were chosen by looking at this same history, so the test has seen the answers. Earlier research (ZEC replacement, Nov 11) found that how a coin ranked in 2019–2022 barely predicted how it ranked in 2023–2026 (rank correlation 0.17). Treat the totals as the upper end, and the year-by-year pattern (most years up, some flat, long losing runs) as what to plan around.

What this means for running the bots

- **Judge each bot over a year, not a month.** Even in this test 34% of BB-CORE's months, 45% of I-CORE's and 48% of T-CORE's were not up.
- **T-CORE is the most profitable and the bumpiest.** Worst drop 50R vs 31R for BB-CORE and 33R for I-CORE. Almost all its profit comes from a few long trends (2021, 2024, 2025); in a year without them (2023) it goes sideways.
- **No coin needs removing on this data.** Every coin on every bot made money over its full history. The weakest spots are ARB on BB-CORE (thin profit, two losing years), NEAR on I-CORE (three losing years) and SUI on T-CORE (short history). ADA has gone flat lately but has the longest good record.
- **Most of the I-CORE and T-CORE gain in the last 12 months is ZEC** (+184R and +245R). Without ZEC their last 12 months would be +46R and +111R: still up, but far smaller.
